Harshavardhan Arrimalla

Product Designer · Complex Workflows, Data-Rich B2B & AI-Native Products
arrimallaharshavardhan@gmail.com · +91 86392 01394 · Hyderabad, India · Portfolio · LinkedIn

SUMMARY

Product designer with 4+ years turning complex, workflow-heavy problems into clear, structured interactions — from B2B supplier onboarding to regulated banking workflows. I own problems end to end: framing the right "why," running research, using behavioral and funnel analytics to locate friction, and shipping measured outcomes. Deep in design systems, information architecture, and accessibility (WCAG AA), with an AI-accelerated workflow (Claude Code, Cursor, Figma MCP) for fast exploration, prototyping, and validation.

EXPERIENCE

Senior Product Designer · Mondee — JUL 2023 — PRESENT · HYDERABAD

- **Broke a complex multi-step B2B workflow into structured, intuitive interactions:** on Aarna AI, Mondee's supplier listing platform, mapped drop-off by funnel step (behavioral analytics), traced friction to dense multi-step forms, and rebuilt the flow as a conversation-first experience. Listing volume tripled, drop-off fell 40%, and the product scaled to 10K+ active users.
- **Designed data-rich, decision-ready UI:** on Miraee, Mondee's consumer travel app, sole designer across iOS and Android — conversational booking flows and a generative card system turning raw fare and itinerary data into scannable, comparable UI.
- **Built and maintain the design system** behind both products — typography and colour tokens, component library, interaction patterns — the source of truth for consistency and reuse across 50+ screens and two platforms.
- **Accessibility built in from the start:** WCAG AA contrast, touch targets, font scaling, and screen-reader flows verified before every release, alongside a high bar for typography, spacing, and interaction detail.
- **Research and validation:** run usability tests and workflow deep-dives, review production builds against design intent screen by screen — including a 106-point verification audit on a cross-platform migration.
- **Cross-functional partnership:** work with PM and engineering in Agile sprints (JIRA) — shape requirements, push back with clear rationale, and annotate specs so engineers implement with minimal ambiguity.

UI/UX Designer · Virtusa — NOV 2022 — JUL 2023

- **Translated regulated-domain workflows into intuitive interfaces:** owned 3–4 end-to-end banking workflows — from requirements through wireframes, high-fidelity UI, prototypes, and annotated specs for an offshore engineering team, where accuracy, hierarchy, and error prevention were critical.

UI Designer · GlobalLogic — FEB 2022 — NOV 2022

- Delivered 30+ UI screens and interactive prototypes for an enterprise digital product across 6+ Agile sprints, contributing reusable patterns and components back to the shared design library.

Graphic & Motion Designer · Prime Pixel — JAN 2019 — DEC 2021

- Motion graphics and visual design (After Effects, Illustrator, Blender) — the typography, hierarchy, and visual-communication foundation behind my interface work.

PROJECTS

Hita — AI Travel Companion (Live) · aihita.in — SELF-INITIATED · LIVE

- **Sole designer on a live consumer AI product:** research, flows, design system, and UI — implemented and shipped it myself (Next.js, React Native, Supabase, Claude API). Evidence I can take an ambiguous problem to deployed, validated software.

SKILLS

Design	Figma (components, variants, tokens) — flows, wireframes, high-fidelity UI, prototyping, dev handoff; Framer
Problem Solving	Problem framing, structured thinking, funnel & behavioral analytics, trade-off decisions, 0→1 in ambiguous problem spaces
Research	Discovery interviews, workflow deep-dives, usability testing, research synthesis
Craft	Design systems, information architecture, interaction design, typography & hierarchy, data-dense interfaces, edge/error states, accessibility (WCAG AA), responsive web + iOS + Android
AI Tools	Claude Code, Cursor, Figma MCP — AI-accelerated exploration, code-based prototyping, iteration, and synthesis; conversational & agentic UX patterns
Visual & Build	After Effects, Illustrator, Photoshop, Blender; React, Next.js, TypeScript — ships production front-end; JIRA

EDUCATION

B.Sc. Computer Science · Purvanchal University (2015 — 2018) · **UI/UX Design Certification** · Prism Multimedia (2021)
